Breed Standard

A Breed Standard is the guideline which describes the ideal characteristics, temperament and appearance of a breed and ensures that the breed is fit for function. Absolute soundness is essential. Breeders and judges should at all times be careful to avoid obvious conditions or exaggerations which would be detrimental in any way to the health, welfare or soundness of this breed. From time to time certain conditions or exaggerations may be considered to have the potential to affect dogs in some breeds adversely, and judges and breeders are requested to refer to the Kennel Club website for details of any such current issues. If a feature or quality is desirable it should only be present in the right measure.

General Appearance: Active, graceful and well balanced, with gentle expression.

Characteristics: Sporting, affectionate, absolutely fearless.

Temperament: Gay, friendly, non-aggressive; no tendency to nervousness.

Head and Skull: Skull almost flat between ears. Stop shallow. Length from base of stop to tip of nose about 3.8 cms (1 1/2 ins). Nostrils black and well developed without flesh marks, muzzle well tapered. Lips well developed but not pendulous. Face well filled below eyes. Any tendency to snipiness undesirable.

Eyes: Large, dark, round but not prominent; spaced well apart.

Ears: Long, set high, with plenty of feather.

Mouth: Jaws strong, with a perfect, regular and complete scissor bite, i.e. upper teeth closely overlapping lower teeth and set square to the jaws.

Neck: Moderate length, slightly arched.

Forequarters: Chest moderate, shoulders well laid back; straight legs moderately boned.

Body: Short-coupled with good spring of rib. Level back.

Hindquarters: Legs with moderate bone; well turned stifle – no tendency to cowhocks or sickle-hocks.

Feet: Compact, cushioned and well feathered.

Tail: Length of tail in balance with body, well set on, carried happily but never much above the level of the back. Docking previously optional when no more than one-third was to be removed.

Gait/Movement: Free-moving and elegant in action, plenty of drive from behind. Forelegs and hindlegs move parallel when viewed from in front and behind.

Coat: Long, silky, free from curl. Slight wave permissible. Plenty of feathering. Totally free from trimming.

Colour: Colour Recognised colours are:

Black and Tan: raven black with tan markings above the eyes, on cheeks, inside ears, on chest and legs and underside of tail. Tan should be bright. White marks undesirable.

Ruby: whole coloured rich red. White markings undesirable.

Blenheim: rich chestnut markings well broken up, on pearly white ground. Markings evenly divided on head, leaving room between ears for much valued lozenge mark or spot (a unique characteristic of the breed).

Tricolour: black and white well spaced, broken up, with tan markings over eyes, cheeks, inside ears, inside legs, and on underside of tail.

Any other colour or combination of colours highly undesirable.

Size: Weight: 5.4-8.2 kgs (12-18 lbs). A small, well balanced dog well within these weights desirable.

Faults: Any departure from the foregoing points should be considered a fault and the seriousness with which the fault should be regarded should be in exact proportion to its degree and its effect upon the health and welfare of the dog.

Note: Male animals should have two apparently normal testicles fully descended into the scrotum.

The **Code of Ethics** is Kennel Club mandatory, it may be amended or changed by the Kennel Club at any time such changes being effective from a date specified by the Kennel Club.

The **Code of Best Practice** is specific to the Southern Cavalier Club; the guidelines for MVD and SM referred to in Para 1 of Parts 3 and 4 are set by veterinary specialists and may be revised at any time.

THE SOUTHERN CAVALIER KING CHARLES SPANIEL CLUB

CODE OF BEST PRACTICE

PART 1: - GENERAL

1. No member should take on more dogs than he or she can care for and keep in a healthy environment.
2. Members should conduct themselves at all times in a manner that is a credit to the Club and ownership of Cavaliers. Members should not use any method of communication whatsoever in a way that could be considered defamatory, insulting or detrimental to another member, or the Club, or to the breed in general nor furnish information including pedigrees and photographs of dogs not owned by them without prior written consent of the owner.
3. Members should adopt properly prepared legal contracts in the sale of puppies or their use of stud dogs, and should be aware of the consequences of any default on their part, whether intentional or not.

PART 2: BREEDING AND EXHIBITING

1. All members should familiarise themselves with the Kennel Club Breed Standard and aim to breed or exhibit dogs that conform to that standard and which have not been changed in appearance by artificial or surgical means except as the breed standard or Kennel Club may allow.
2. Members will, when breeding dogs, adopt as a minimum standard the principles, requirements and recommendations as embodied in the Kennel Club's Assured Breeder Scheme. It is strongly recommended that members who breed should apply to join the scheme.
3. All members must keep accurate breeding records, registration documents and pedigrees.
4. All members must breed only from or with dogs registered with the Kennel Club or Clubs affiliated to the Kennel Club.
5. All surviving puppies should be registered with the Kennel Club by the time they reach the age of twelve months.
6. Restricted Registration certificates should be used to discourage unsuitable stock being bred from.
7. No puppies are to be passed to their new owners under eight weeks of age.
8. Members should not, under any circumstances, make false or exaggerated claims that cannot be substantiated, for example, about future prospects of puppies, quality of breeding stock, or record of show wins.
9. Members should use best endeavours to ensure that all stock is healthy at time of sale, unless agreed otherwise and put in writing and acknowledged by the purchaser, such stock having been checked for known hereditary and other health problems and the purchaser being given full access to the results.
10. Use best endeavours to ascertain that every prospective owner is suitable, and to resume responsibility for their stock, where practicable, if it proves unsuitable for its new home for whatever reason.

This provision also applies when stock is to be exported, with the additional responsibility of the Exporter to use best endeavours to ensure the dog's welfare in transit. Members are reminded that not all countries have protective animal welfare laws, nor Breed Clubs that cater for the welfare of the breed. It is the sole responsibility of the exporter to ensure that adequate welfare provisions exist.

11. Breeding terms should only be taken on with care. All parties should understand fully the terms, these being agreed in writing. Kennel Club 'Loan of Bitch Agreement' or other

form of written contract should be used, preferably witnessed and properly signed with all parties retaining a signed copy.

12. Specific health recommendations for MVD are shown in Appendix A and for Syringomyelia in Appendix B. Note that these recommendations are subject to change and a link to the most up-to-date versions can be found on the Southern Cavalier King Charles Spaniel Club website at www.cavalier.info/clubs/southern.

PART 3:- DOGS TO BE USED AT STUD.

1. No dog which has a known physical defect that could be detrimental to the health and well being of the offspring or the breed in general should be used at stud. By way of guidance, dogs under five years of age should hold a current clear heart certificate. A current clear eye certificate is strongly recommended. More specific guidelines apply to MVD and Syringomyelia
2. Stud dog owners are advised to see the bitch's pedigree and registration certificate to establish ownership, age and endorsements. The number of litters, number of puppies and when she last had a litter, should also be ascertained. It is advisable that the bitch should have a full health check before mating and stud dog owners should assure themselves that this has taken place and was satisfactory.
3. Any dog that is to be used at stud should be annually checked for good health, and be free from infection, and be in good condition at the time of mating.
4. Stud dog owners should be aware of the risk of cross infection and allow sufficient time between mating different bitches, to minimise the risk. The owner of the bitch should be informed of the previous mating if less than 48 hours has elapsed.

PART 4:- BITCHES TO BE USED FOR BREEDING.

1. No bitch with a known physical defect that could be detrimental to the health and well being of the bitch, her offspring or the breed in general should be used for breeding. By way of guidance, any bitch used for breeding should hold a current clear heart certificate. A current clear eye certificate is strongly recommended. These certificates should be available to the owner of the dog at the time of mating. More specific guidelines apply to MVD and Syringomyelia
2. No bitch to be mated so as to whelp before she is 16 months old, and then only if she is considered mature enough to raise a litter of puppies.
3. No bitch to be mated so as to rear a litter after her eighth birthday.
4. No bitch should normally rear a litter on consecutive seasons, and in any case, must have no more than one litter in any 12 month period.
5. No bitch to be allowed more than six litters in her lifetime.
6. No bitch to be mated who has had two caesarean sections, as this would indicate possible whelping difficulties.
7. Any bitch used for breeding should be protected from known diseases when available, be annually checked for good health, be free from any infection, and be in good condition at the time of mating.
8. Bitches received from overseas for mating should be returned as soon as possible. This should be within 4 weeks from the date of mating.
9. No bitch more than 4 weeks in whelp should be exported or imported.

PART 5:- RESPONSIBILITY.

1. Once a mating has taken place, the owners of the bitch have a responsibility for the good welfare of the progeny throughout their lifetime and as such have an obligation to help new owners if requested to do so. Stud dog owners also have a moral obligation for the welfare of the puppies.

Appendix A: MVD BREEDING GUIDELINES

The guidance given to breeders wishing to reduce the incidence of MVD in Cavaliers, remains the same, and is as follows:

THE BROOD BITCH

Should be a minimum of 2½ (two and a half) years old with a clear heart, and parents with clear heart certificates, issued at 5 (five) years or older.

THE STUD DOG

Should preferably be at least 2½ (two and a half) years old with a clear heart, and with parents with clear heart certificates issued at 5 (five) years of age or older.

THESE ARE MINIMUM RECOMMENDATIONS.

To use an older stud dog with a clear certificate issued as late in life as possible is highly desirable

IT IS STRONGLY ADVISED THAT BREEDING STOCK UNDER 5 (FIVE) YEARS OF AGE IS LIMITED TO THOSE WITH CLEAR HEART CERTIFICATES. HOWEVER, AN OLDER DOG WITH A SLIGHT HEART MURMUR SHOULD NOT BE IGNORED.

Please remember, dogs do not have to have a clear heart to be used at stud.

It is the dogs with **EARLY ONSET** murmurs (under five years of age) that we are so strongly advised to avoid using for breeding.

Breeders should aim at raising the age of onset of MVD by selecting breeding stock with a good heart record.

Club guide-lines are based on current recommendations of Geneticists and Cardiologists, and may be updated and reissued as further research information becomes available.

Appendix B: CKCS MRI screening and breeding recommendations

The diagnosis of syringomyelia is easily confirmed by MRI but neurologists have yet to define what is meant by the term 'clear' given that most cavaliers have a degree of skull malformation. The late onset of clinical signs and the number of asymptomatic dogs adds to the complexity of the condition. Not enough is known about long term progression to ascertain the optimum age young dogs should be screened for the disease. The research is an evolving process and hopefully a proven accurate and UNIVERSAL scheme will be developed eventually. Recent studies suggests that in the vast majority of cases the syrinx starts in the upper cervical spinal cord so if this is included then scanning of the entire cord (more expensive) may not ultimately be necessary. Any 'normal' dog without the occipital malformation which makes the skull small has a genetic advantage and should be used for breeding.

The scan, for an additional fee will be scrutinised by a panel of veterinary surgeons and a conclusion re grading will be decided. This will then be published on KC registration papers and the information used to assist the Estimated Breeding Values scheme (EBV).

The following grades will be given for Chiari-like Malformation:

Grade 0 — NO chiari malformation

Grade 1 — Cerebellum indented (not rounded)

Grade 2 — Cerebellum impacted into or herniated into foramen magnum

When viewing the images for syringomyelia it is sometimes possible to view a presyrinx, which is cord oedema. This may be transitional.

The following grades will be given for Syringomyelia:

Grade 0 — Normal (No central canal dilatation, no presyrinx, no syrinx)

Grade 1 — Central Canal Dilatation less than 2mm, dog aged 6 or more

Grade 2 — Central Canal Dilatation less than 2mm wide, dog aged under 6

Grade 3 — Syrinx or Presyrinx or Central Canal Dilatation 2mm or greater than 2mm

There will be a standardised assessment using 2 scrutineers from the panel.

If necessary the chief scrutineer will make the final decision.

There will be an appeals procedure.

Anticipated 2 week turnaround.

The recommendations for breeding are:

SM grade	Age (years)	Breed to
0a (normal)	Over 5	Any
0b (normal)	3–5	SM grade 0a, 0b, 0c, 1a
0c (normal)	1–3	SM grade 0a, 0b, 1a
1a (CCD)	Over 5	Any
1b (CCD)	3–5	SM grade 0a, 1a
1c (CCD)	1–3	SM grade 0a, 1a
2a (SM)	Over 5	SM grade 0a, 1a
2b (SM)	3–5	SM grade 0a, 1a
2c (SM)	1–3	Do not breed
Any dog with clinical signs of CM/SM	Any	Do not breed

Appendix C: AHT Schemes

ECVO and The AHT Eye scheme – the Animal Health Trust offers a similar screening programme for inherited eye diseases the results of which are recorded and published by the Kennel Club and are included in their Health Test Results Finder

Dry Eye Curly Coat syndrome and Episodic Falling – The Animal Health Trust has launched two new DNA tests for these conditions in Cavaliers. Testing is done by posting a cheek swab sampling kit to owners who submit it to the AHT laboratory. A certificate is sent to the owners.

The scheme was launched in August 2011 and breeders should contact the AHT for the latest details of participation. http://www.aht.org.uk/cms-display/genetics_curleycoat.html
